

Polaris Guidance Systems, LLC

WITSML Solutions Provider

WITSML Viewer

Visualize real-time WITSML data stores and generate custom reports with the WEB based WITSML Viewer. The Viewer features a customizable user interface using your WEB browser eliminating any software installed on the client computer. The Viewer server caches data from all selected wells for maximum performance switching between wells.

Features include:

- WEB browser user interface utilizing the latest HTML 5 technologies
- Depth log viewing for up to 16 data curves
- MD, TVD or VS corrected real-time curve plots
- Manages multiple wells across multiple WITSML stores simultaneously
- WITSML data cached for maximum speed and efficiency
- User programmable graphical interface for flexible customization
- Graphical elements such as track plots, gauges, rosebud, etc.
- Variety of survey plots including 3D and geology layouts
- Continuous form PDF plots using industry standard layouts
- Survey reports, plotting and data exporting
- Export formats include XLS, PDF, CSV and LAS version 2.0 and 3.0
